

# Is Ulcerative Colitis limiting your daily living?

**We are looking for people diagnosed with Ulcerative Colitis to participate in a clinical research study to investigate a possible new treatment.**

## **You may qualify if you:**

- *Have been diagnosed with moderate-to-severely active ulcerative colitis*
- *Have tried and failed at least one biologic treatment*
- *Are currently experiencing symptoms of ulcerative colitis*

Consider participating in a clinical research trial for a chance to improve treatment options for those with poorly managed ulcerative colitis. Choosing to participate in a clinical research trial is an important decision. The information obtained from the research study may help in the treatment of future patients with moderate-to-severely active ulcerative colitis and will provide important information about how well people respond to the study drug being investigated.

All clinical trials are highly regulated to protect your safety and human rights. The research team can help explain this to you in further detail so that you are fully informed about the trial before you decide whether you would like to participate.

Insurance is not required

Compensation for time and travel may be provided

What do I do next?
